About me

Software engineer specializing in full-stack web development with primary focus on the front-end technologies. Fueled by undoubtedly weird sense of humor and lots of coffee (mostly the latter), I spend most of my waking hours looking for interesting project ideas and ways to leave my mark on the ethereal thing that is the Internet.

Technologies

 HTML  CSS  JS (ES6+)  TS  React (Context API, Router)  Redux  Vue
 Express.js  GraphQL  MongoDB (Mongoose)  Heroku  WordPress  git

Experience

Frontend Developer @ [Neopix](#)

February, 2022 – Present

 Coming soon...

WordPress Developer @ [BlueGrid](#)

February, 2020 – January, 2022 (2 years)

-  Custom theme, templates and post types development for a highly trafficked website
-  Converting Figma designs to fully responsive, functional and interactive website pages
-  SEO and performance optimization using various caching and lazy-loading techniques
-  Custom solutions development using React along with TypeScript and 3rd party APIs
-  Production of clean, easily-maintainable and scalable JavaScript, CSS and php code

WordPress Developer @ [lvapix](#)

September, 2018 – January, 2020 (1 year 5 months)

-  Designed, developed and shipped beautiful and modern-looking websites for clients
-  Website hosting maintenance through cPanel and maintenance of the website itself
-  Tracked analytics and SEO performance using Google Search Console and Analytics
