About me

Software engineer specializing in full-stack web development with primary focus on the front-end technologies. Fueled by undoubtedly weird sense of humor and lots of coffee (mostly the latter), I spend most of my waking hours looking for interesting project ideas and ways to leave my mark on the ethereal thing that is the Internet.

Technologies

HTML CSS JS (ES6+) TS React (Context API, Router) Redux Vue Express.js GraphQL MongoDB (Mongoose) Heroku WordPress git

Experience

Frontend Developer @ Neopix ⧉
February, 2022 – Present

> Coming soon...

WordPress Developer @ BlueGrid ⧉
February, 2020 – January, 2022 (2 years)

> Custom theme, templates and post types development for a highly trafficked website
> Converting Figma designs to fully responsive, functional and interactive website pages
> SEO and performance optimization using various caching and lazy-loading techniques
> Custom solutions development using React along with TypeScript and 3rd party APIs
> Production of clean, easily-maintainable and scaleable JavaScript, CSS and php code

WordPress Developer @ Ivapix ⧉
September, 2018 – January, 2020 (1 year 5 months)

> Designed, developed and shipped beautiful and modern-looking websites for clients
> Website hosting maintenance through cPanel and maintenance of the website itself
> Tracked analytics and SEO performance using Google Search Console and Analytics
